Objectives

To achieve the mission and goals, the Academy has set the following objectives.

Impart quality education in the fields of Atmospheric science, Oceanography, Meteorology, Agriculture, Horticulture, Agricultural engineering, Renewable Energy, Water Management, Bio-Chemistry, Statistics, Computer Programming, Remote Sensing and GIS, Home science and other allied sciences in order to make it responsive to the growing demands of the society in general, and the aspirations of the farming community, in particular.

Serve as the nodal agency dealing with climate change education, research and capacity building in all the aspects of climate risk management and weather related natural disaster management by creating the most competent postgraduates in this field of emerging science.
